

SONICS SHOUTOUT WEEK 8 UPDATE

Design team

The design team has been spending their time finishing assembly prints, as well as finishing and releasing almost every assembly to the build team. They also looked for places to take out some weight. Some members also took initiative to create some buttons with our logo on them to hand out at competitions.

The Final Stretch

With our first competition less than two weeks away, the team is working hard at the final assemblies and wiring up this year's robot. Spirits are running higher than ever, and everyone is ready for the season to come.

Build Team

This week build was able to finish putting together the robot along with small upgrades and final weight reduction. They're also assisting programming team with anything they need to finish wiring the robot.

Sponsor Shoutout

We are happy to recognize one of our sponsors, E3 Integrated Engineering. They're one of our newer sponsors, and this year they've generously coming alongside us with a financial donations for both our high school and middle school teams.

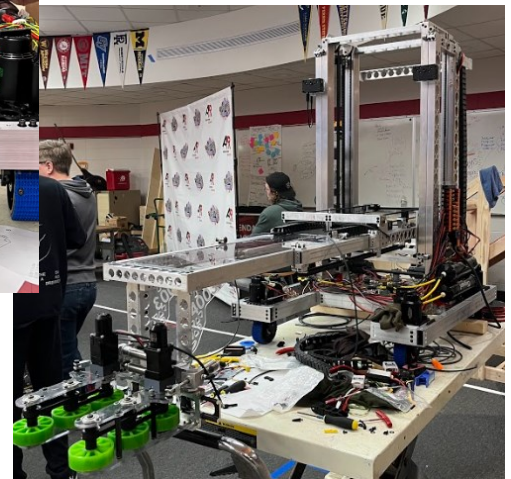

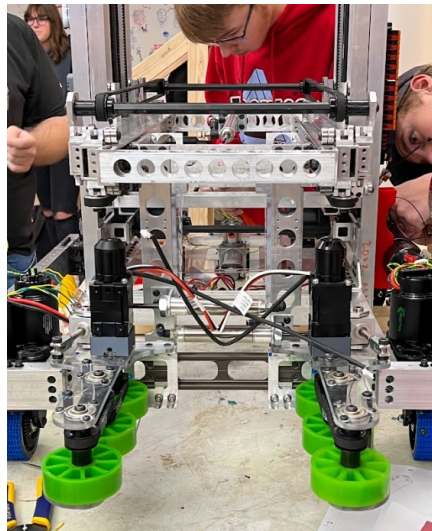

Allendale Robotics thanks you! Be sure to keep checking your inboxes for our weekly updates!

Fabrication Team

Fabrication has been hard at work with finishing up all critical parts for the robot and only have safety guard polycarbonate pieces to finish.

Programming team

In programming, they've been working on wiring the newly build robot, as well as planning out button controls for the driver and operator. On top of that, they've been setting boundaries for the intake and lift systems.

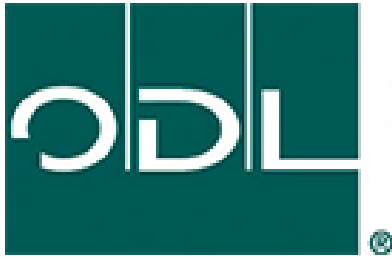

Interested in sponsoring?

Our program is always welcoming new sponsors! If you think this is something your organization would consider, contact us at sponsorship@allendalerobotics.com or scan the QR code for more details.

THANK YOU SPONSORS FOR YOUR SUPPORT
