

SONICS SHOUTOUT MICHIGAN STATE CHAMPIONSHIP

Day 1

Day 1 began with early morning inspections, practice matches, and the first of the qualification matches. With these underway, there was plenty of team spirit to go around.

Day 2

The next morning brought immediate qualifications, and as time progressed, our scouting data became further developed as we neared alliance selections at the end of the day. We ended up with a great alliance, and started strategizing for the final matches.

And the award goes to...

This event, The TriSonics were recognized for the 2023 Excellence in Engineering Award. This is a great honor for our team and we are very grateful for the judges considerations.

Day 3

Day 3 started out with a bang as finals began. Our alliance made it to the Lower Bracket of the elimination rounds, and qualified for the World Championships!

Houston, here we come!

After six weeks of designing, building and programming our robot, three competitions, and plenty of TriSonics spirit, we are excited to announce that after participating in the state finals, we qualified for the World Championships, which will be held in Houston, TX, April 19th—22nd.

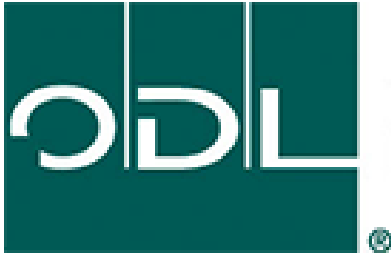

We had a lot of successes as well as our share of shortcomings this season, but it was all in how we, as a team, learned and grew from all of our experiences with creating our robot this year.

Interested in sponsoring?

Our program is always welcoming new sponsors! If you think this is something your organization would consider, contact us at sponsorship@allendalerobotics.com or scan the QR code for more details.
