

SONICS SHOUTOUT WEEK 4 UPDATE

PUTTING IT TOGETHER

This week, our team is rounding the corner of designing the robot. With the main frame up, our build team is getting prepared to get their hands on the drawings.

With competitions about a month away, our team's spirits are high, and we're reading to take on anything and everything.

SPONSOR SHOUTOUT

This week we are happy to recognize our new sponsor, Autobody Xperts! This year, they've generously come along side us with a financial donation.

So from all of us at Allendale Robotics and the TriSonics, thank you, and be sure to keep checking your inboxes for our weekly updates!

INTERESTED IN SPONSORING?

Our program is always welcoming new sponsors! If you think tis is something your organization would be able to do, contact us at sponsoship@allendalerobotics.com or scan the QR code.

DESIGN TEAM

Finishing up with the intake designs and printing out drawings of the new robot is high on the priority list for our design team. With competition season right around the corner, we need to have those in for the build team to get building.

BUILD TEAM

While the design team has the reigns, the build team is helping out with odds and ends jobs for the rest of the team, including building desks for design, preparing for a new CNC router, and helping fabrication team.

FABRICATION TEAM

Since the design team is getting drawings for the robot done, the fabrication team is hard at work building these parts for when the time comes to put them together.

PROGRAMMING TEAM

Even though we don't have a robot yet, the programming team is working on building a new system of code and applying it to last years robot in preparation for this season.

THANK YOU TO OUR SPONSORS FOR YOUR SUPPORT
