January 12 – January 18

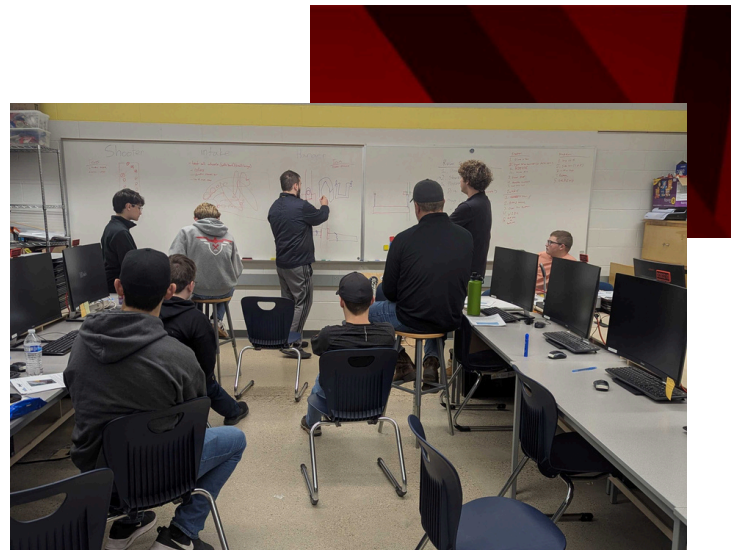

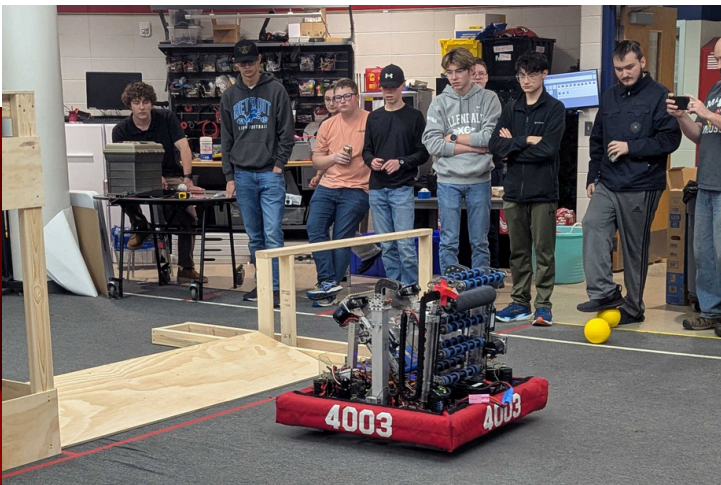

## Week 1 Overview

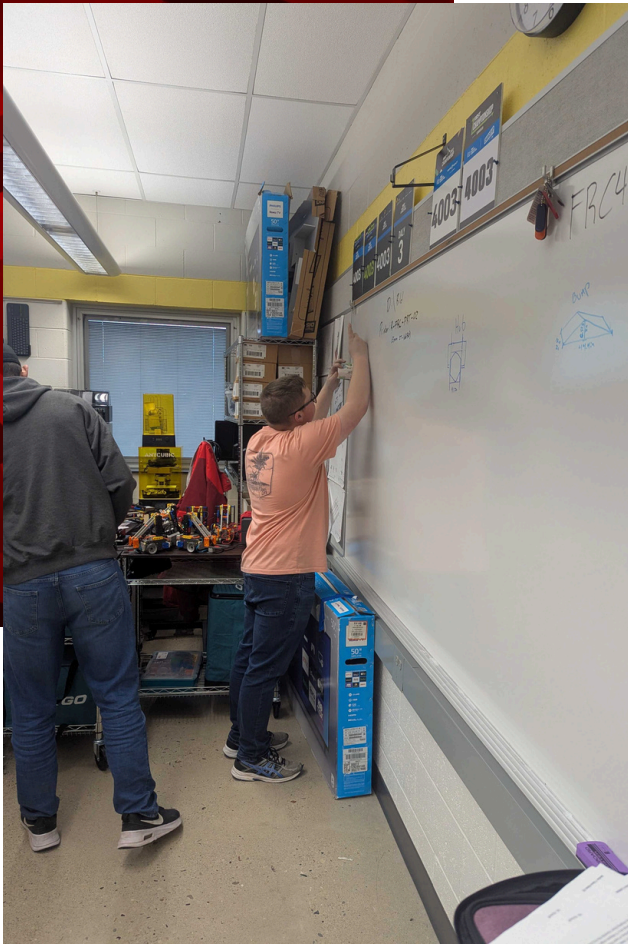

We had our season kickoff on Saturday, January 10! The team watched the kickoff livestream together and then immediately began evaluating the game and developing strategies.

Due to school closing, we had a setback for practice on Monday. But that didn't stop us from getting right back to work the following day. With the plan for our next steps established, the team split into smaller groups again to begin prototyping different ideas.

One major part we're working on is the feeder, being able to intake game pieces quickly for transport is one of our top priorities for the season.

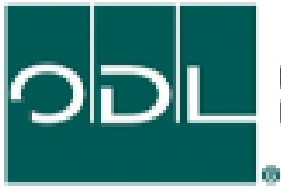

# Team Focus

## Kickoff

The team split into small groups led by the seniors and drafted ideas based on observations from the game manual to present to the rest of the team. By summarizing what we found, we were able to define our goals and prioritize for the season.
