March 2 - March 8

## Week 8 Overview

This week, our teams been working hard to finalize the robot and prepare everything for our upcoming competitions.

The design team has been finalizing the sub-assemblies, including the live bottom, double shooter, and intake. As well as releasing drawings for the build team.

The build team has assembled all the individual double-shooter assemblies, the second frame for the beta bot, and continued working on the hanging system for the robot.

The programming team got the robot working in field-centric drive mode and has made progress on developing the vision for the turret.

The sponsorship team has been working on easter cards to make for the local nursing home and the children's hospital.

# VexV5

## Team C “Voltage Vipers”

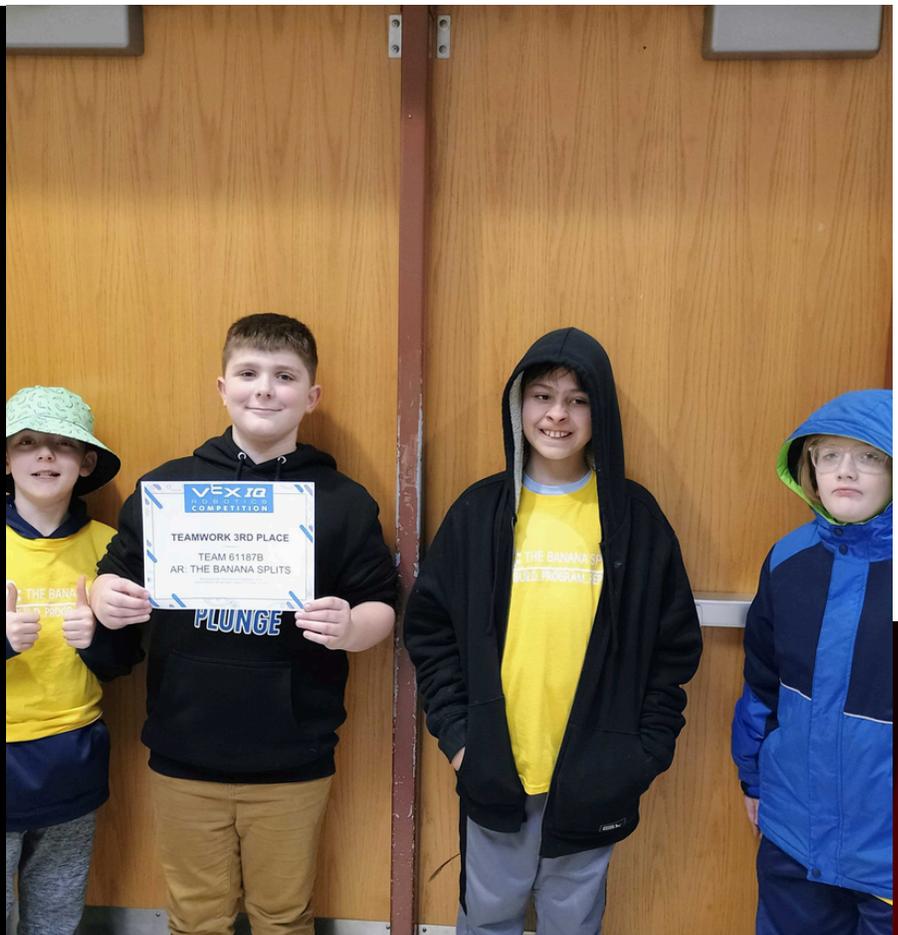

They recently went to a competition, and despite not scoring high, they were able to make it to worlds through their skills and sportsmanship points.

They’re excited to go to Worlds and see all kinds of people and robots from all around the world.

# VexIQ

## Team 61187B

Congratulations to VexIQ for making it to State Championship!  
Their modified version of the hero bot allows them to consistently score points and place third overall.
