March 9 - March 15

Week 9 Overview

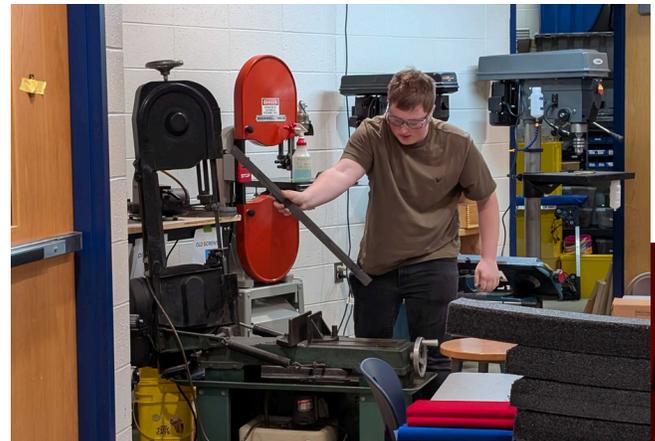

This week, the team is in crunch time to get the robot ready for our first competition in Jackson next week!

The design team has worked on the new double shooter, the live bottom conveyor belt system, the robot hanging system, and the new control panel assemblies, planning to have everything ready for the competition.

The build team has finished all of the parts for the second robot and is currently making bumpers and bumper brackets. Next week, they plan to make extra parts to prepare for repairs in our competition.

The programming team has started finalizing autons and finishing wiring for the beta robot. Next week, they plan to have these done and packed for our competition.

The sponsorship team has been getting ready to present the Impact Award at our first competition, as well as being more active on social media with our progress.

Team Focus

Student mentoring

Students from our older teams visit our younger teams to help support and guide them through their season. For example, Cole from the high school team has been regularly mentoring students this year and has been recognized by others for his efforts!

VexV5

Team 61187 C

Attention Span Zero

Our VexV5 team, Attention Span Zero, has received 2 skills awards at their recent championship! They're also going to the US Open create event in Iowa March 19th-21st. Congratulations!
